

noiep³ 2018 3 AT THE G

Melbourne, Australia
9-11 November 2018

Professor Peter O'Sullivan
The Cognitive Functional Therapist

Professor Peter O'Sullivan is Professor at the School of Physiotherapy and Exercise Science at Curtin University and part time Specialist Musculoskeletal Physiotherapist (as awarded by the Australian College of Physiotherapists) in Perth, Australia. Peter and his team conduct clinical research to investigate the life course, underlying mechanisms and targeted management of persistent musculoskeletal pain disorders. They have developed an integrated person-centred management approach called Cognitive Functional Therapy. He has published multiple papers and numerous book chapters in international peer review journals and is an invited speaker at conferences worldwide. He is also well known for his characteristic curls and distinct Kiwi accent.

Dr Lorimer Moseley
The Neuroscientist

Professor Lorimer Moseley is Professor of Clinical Neurosciences and Chair in Physiotherapy at the University of South Australia. He has over 25 years clinical experience working with people in chronic pain, has extensive research publications in internationally reputable journals, has authored multiple books and chapters and continues to present keynote lectures globally. His work is cited in clinical guidelines internationally and he is an honoured member of the Australian Physiotherapy Association. Lorimer is an NHMRC Principle Research Fellow, leader of the Body in Mind research group at UniSA, Adelaide and at Neuroscience Research Australia, Sydney. You might spot Lorimer zipping around the city on his scooter or sipping a latte at your local trendy café.

Dr David Butler
The Educationalist

Associate Professor David Butler is the Director of Noigroup and Associate Professor at the University of South Australia. He has over 30 years of clinical experience treating complex pain conditions, has authored multiple books on Explaining Pain and is an honoured member of the Australian Physiotherapy Association. He later went on to complete his Doctorate in Education to further his professional love of devising ways to take the complex 'gifts' of neuroscience to students, clinicians and sufferers in ways that can change their lives. Despite his accolades, he is famous for his lairy green glasses and frequent use of pet names like 'Possums' and 'Rockstars'.

EP3 is back in 2018 and we're bringing three iconic names to one of Australia's most iconic locations - the Melbourne Cricket Ground - better known as simply "The G". NOI is very excited to be joined by Peter O'Sullivan for the first time, who together with Lorimer Moseley and David Butler will be presenting a unique education event bringing you the latest from the worlds of pain treatment, neuroscience and education.

Venue
Melbourne Cricket Ground
Brunton Ave, Richmond VIC 3002

Where do I sign up?
Spaces are limited so register your interest by filling out the registration form. Places are confirmed following payment.

Host Fran Ammirato (NOI HQ)
Email fran@noigroup.com
T (08) 8211 6388 (Tue - Fri)

Cost \$1250.00 inc. GST per registrant
Includes workbook, tea breaks, lunches and lunchtime activities.

Pre-requisites
A strength of the Explain Pain course is that participants come from many professions, so please come with an open mind. Pre-reading the Explain Pain Second Edition book would also be ideal.

Course delivery
The course will be a blend of lectures, interaction and practical workshops, with ample time to mix with the presenters throughout the three days.

Who is it open to?
EP3 2018 is open to all professionals working with people experiencing acute and chronic pain, including physiotherapists, occupational therapists, doctors, psychologists, nurses, chiropractors, osteopaths, massage therapists and others.

I've been to an EP3 before - shall I come again?
YES! There will be lots of completely new original material, new science and new jokes.

What is the difference between an EP and an EP3?
The three day EP3 events assume a solid pain knowledge-base and aim to advance your thinking, understanding and treatment of pain. If you are new to pain science and education concepts, EP is the course to start with. Explain Pain covers the core pain biology and the 'how to' of Explaining Pain.
