Mobilisation of the Neuroimmune System

*Mobilise – to prepare, to awaken and to move*

**Two-day course with Prof Michel Coppieters & Dr David Butler**

NOI’s classic, longest running course, Mobilisation of the Nervous System, has evolved. Based on the latest evidence, the course has been completely updated and re-written ‘from the basic science up’. The research is compelling – the immune system via its interaction with the nervous system is a critical player in learning, memory, movement and sensitivity. This new understanding integrates peripheral and central processes and targets therapy towards healthy neuroimmune balance.

This comprehensive lecture and hands-on course integrates the latest research on neurodynamics and neuroimmune science to provide a clinical reasoning framework to identify those patients who will benefit from neuroimmune mobilisation. The course then updates and refines the essential practical skills to examine and manage the physical health of the nervous system – skilled, safe and appropriately timed handling techniques are covered in detail during labs and practical sessions.

**Course aims**

- Provide a basic knowledge of neuroanatomy, neurodynamics, neuroimmunology and neuropathobiology related to the manual examination of the nervous system.
- Teach safe and effective diagnostic skills in the examination and interpretation of physical dysfunction of the nervous system.
- Present neurodynamic movements and techniques as antigenic.
- Provide new therapeutic narrative for explaining symptoms in conditions with altered neurodynamics.
- Deliver a deeper understanding of known, ‘tough’ clinical presentations such as chronic nerve root problems and persistent entrapment pathologies.

**This course is open to:** Registered allied health professionals and registered medical practitioners, physiotherapists, occupational therapists, clinicians with a ‘hands-on’ license.

**The Sensitive Nervous System and The Neurodynamic Techniques DVD & Handbook**

These rehabilitation resources complement each other and are suitable for any therapist involved in movement rehabilitation. *The Sensitive Nervous System* provides the most in-depth information of neurodynamics from peripheral and central viewpoints and *The Neurodynamic Techniques DVD and Handbook* richly illustrates this through both film and image.

Produced by Noigroup Publications | www.noigroup.com/store

---

**Adelaide, SA, Australia | 24-25 July 2015**

**Venue**

Rockford Hotel Adelaide
164 Hindley Street, Adelaide

**Cost**

$695.00 incl GST
Cost includes workbook and catering.

**Host**

Fran Ammirato
fran@noigroup.com
Telephone Tues-Fri: (08) 8211 6388

**To register / further information**

Places are limited, confirmation sent following payment

Options to register your interest:

- lodge a formal enquiry via noigroup.com/courses
- contact the course host (details above)
- submit the registration form overleaf

---

**Michel Coppieters** is currently Professor at VU University Amsterdam, coordinating the research masters in musculoskeletal physiotherapy, Michel has a special interest in nerve disorders and pain. Renown for his pioneering research in neurodynamics, the aim of Michel’s current research is to obtain a better understanding of the pathophysiology of human nerve compression and to develop and evaluate novel management approaches for patients with neuropathic pain.

Prior to his placement in Amsterdam, Michel was Associate Professor at The University of Queensland and director of the Neuropathic Pain Research Group in the Centre for Clinical Research Excellence in Spinal Pain, Injury and Health. Check [PubMed](https://www.ncbi.nlm.nih.gov/pubmed) and [noigroup.com](http://www.noigroup.com) for a list of recent publications.

**David Butler** has an international reputation for innovative clinical thinking, translation of basic science findings into real world applications, and being able to communicate both like no-one else. He is author of several books, including *Mobilisation of the Nervous System, The Sensitive Nervous System* and co-author of *Explain Pain* and *The Graded Motor Imagery Handbook*. He has developed and implemented pain science curricula for undergraduate and post-graduate programmes, has taught over five thousand clinicians in 25 countries and is also a regular keynote speaker at international clinical conferences.
**Mobilisation of the Neuroimmune System** two-day course
presented by Michel Coppieters and David Butler

**Date:** Friday and Saturday, 24-25 July 2015

**Time:** Friday 8:30am to 5pm (Registration 8:30 - 9am) | Saturday 9am to 4:30pm

**Venue:** Rockford Hotel Adelaide, 164 Hindley Street, Adelaide

**Cost:** $695.00 (GST inclusive). Cost includes catering and workbook.

**Enquiries:** Fran Ammirato – courses@noigroup.com or telephone (08) 8211 6388 Tuesday to Friday.
