Mobilisation of the Neuroimmune System

Mobilise – to prepare, to awaken and to move

Two-day course with Prof Michel Coppieters

NOI’s classic, longest running course, Mobilisation of the Nervous System, has evolved. Based on the latest evidence, the course has been completely updated and re-written ‘from the basic science up’. The research is compelling – the immune system via its interaction with the nervous system is a critical player in learning, memory, movement and sensitivity. This new understanding integrates peripheral and central processes and targets therapy towards healthy neuroimmune balance.

This comprehensive lecture and hands-on course integrates the latest research on neurodynamics and neuroimmune science to provide a clinical reasoning framework to identify those patients who will benefit from neuroimmune mobilisation. The course then updates and refines the essential practical skills to examine and manage the physical health of the nervous system – skilled, safe and appropriately timed handling techniques are covered in detail during labs and practical sessions.

Course aims
• Provide a basic knowledge of neuroanatomy, neurodynamics, neuroimmunology and neuropathobiology related to the manual examination of the nervous system.
• Teach safe and effective diagnostic skills in the examination and interpretation of physical dysfunction of the nervous system.
• Present neurodynamic movements and techniques as antigenic.
• Provide new therapeutic narrative for explaining symptoms in conditions with altered neurodynamics.
• Deliver a deeper understanding of known, ‘tough’ clinical presentations such as chronic nerve root problems and persistent entrapment pathologies.

This course is open to: Registered allied health professionals and registered medical practitioners, physiotherapists, occupational therapists, clinicians with a ‘hands-on’ licence.

The Sensitive Nervous System and The Neurodynamic Techniques DVD & Handbook

These rehabilitation resources complement each other and are suitable for any therapist involved in movement rehabilitation. The Sensitive Nervous System provides the most in depth information of neurodynamics from peripheral and central viewpoints and The Neurodynamics Techniques DVD and Handbook richly illustrates this through both film and image.

Produced by Noigroup Publications | www.noigroup.com/store

Sydney, NSW, Australia | 29 - 30 July 2017

Venue
Physoise
122 Lang Road, Entertainment Quarter
Moore Park, NSW

Cost
$850.00 incl GST
Cost includes workbook and catering.

Host
Fran Ammirato
fran@noigroup.com
Telephone Tues-Fri: (08) 8211 6388

To register / further information

Places are limited, confirmation sent following payment

Options to register your interest:
• lodge a formal enquiry via noigroup.com/courses
• contact the course host (details above)
• submit the registration form overleaf

Michel Coppieters
Currently Professor at VU University Amsterdam, Michel coordinates the research masters in musculoskeletal physiotherapy, his special interest area being nerve disorders and pain.

Renown for his pioneering research in neurodynamics, the aim of Michel’s current research is to obtain a better understanding of the pathophysiology of human nerve compression and to develop and evaluate novel management approaches for patients with neuropathic pain. Prior to his placement in Amsterdam, Michel was Associate Professor at The University of Queensland and director of the Neuropathic Pain Research Group in the Centre for Clinical Research Excellence in Spinal Pain, Injury and Health. Check PubMed and noigroup.com for a list of recent publications.

What is NOI?

Neuro Orthopaedic Institute (NOI) has been in operation for 20 years, with instructors working on all continents with multidisciplinary audiences. NOI faculties exist in the United States, Canada, Australia, United Kingdom, German speaking Europe, Italy, Spain, Scandinavia, and more recently, Chile and India. Organising over 100 seminars a year throughout the world, NOI’s faculty members are active in many conferences, university programmes and other postgraduate education sessions. The company reinvests in education and around 10% of educational fees go towards clinically based research.
Mobilisation of the Neuroimmune System | Sydney, 29 - 30 July 2017 | Michel Coppieters

Date: Saturday and Sunday, 29 - 30 July 2017
Time: Saturday 8:30am to 5pm (Registration 8am to 8:30am) | Sunday 9am to 4:30pm
Venue: Physiocise, 122 Lang Road, Entertainment Quarter, Moore Park, NSW Australia
Cost: $850.00 (incl.GST) Incl. morning/afternoon teas, lunches, workbook, two recognise™ online licences
