Explain Pain resources

Explain Pain and the philosophy and research behind the revolution have become a huge influence on pain management since its release in 2003. *Explain Pain* resources aim to give clinicians and people in pain the knowledge to challenge pain and to consider new models that underpin the pain process. This is the start of an evidence based road to recovery.

	[\$AUD incl GST]

Neurodynamic resources

The last two decades have seen the rapid growth and influence of the powerful and linked forces of the neurobiological revolution, the evidence based movements, restless patients and clinicians.

NOI's neurodynamics resources are extremely comprehensive, applicable to the clinic, and easy to understand. They offer management strategies using best evidence from basic sciences and outcomes data.

<i>(The Sensitive Nervous System + Neurodynamic Techniques)</i>	

*all prices incur 10% GST in Australia only

Brain training resources

Graded Motor Imagery (GMI) is a sequential process of brain exercises consisting of laterality reconstruction, motor imagery and mirror therapy. Due to recent advances in neuroscience, concepts of neuroplasticity have brought about brain training therapies such as GMI which integrates established principles of graded exposure and response prevention.

	[\$AUD incl GST]
