

Mobilisation of the Neuroimmune System

Sydney, Australia

Saturday 24 – Sunday 25, August 2019
with Michel Coppieters

VENUE Rydges North Sydney
54 McLaren Street,
North Sydney NSW 2060

COST AUD \$ 850 inc. GST
Includes workbook and catering

ENQUIRIES

Host and Event Coordinator: Fran Ammirato

Email: fran@noigroup.com

Phone: +61 (08) 8211 6388 (Tue - Fri)

To register

Complete the registration form on the back of this flyer, return by email or fax.

This course is open to

Allied health professionals and registered medical practitioners, physiotherapists, occupational therapists, clinicians with a 'hands-on' license.

Enhancing your course outcomes

A strength of NOI courses is that participants come from many professions, so please come with an open mind. If you want to get ahead of the game, here are some recommended readings:

- Butler DS (2000) *The Sensitive Nervous System*, Noigroup, Adelaide. (Chapters 2-5)
- Nee RJ, Butler DS 2006 *Management of peripheral neuropathic pain. Integrating neurobiology, neurodynamics and clinical evidence. Physical Therapy in Sport: 7: 36-49*
- Yirmiya R, Goshen I (2011) *Immune modulation of learning, memory, neural plasticity and neurogenesis. Brain, Behav, Immun 25: 181*
- Schmid AB, Nee RJ & Coppieters MW (2013) *Reappraising entrapment neuropathies - Mechanisms, diagnosis and management. Musculoskeletal Science and Practice. 18(6) 449-457*

Terms and conditions

- Registrant cancellation: Up to 21 days prior to the start of the course – NOI will refund the course fee less a \$50.00 administration fee. Eight to twenty days prior to the start of the course – NOI will refund 50% of your total cost. Within 7 days of the start of the course - No refund, however, your registration may be transferred to a colleague, in which case they will need to submit a registration form so we have their contact details.
- In the event of NOI having to cancel the course due to unforeseen circumstances notification will be sent as soon as possible via your contact details provided and registrants will receive a full refund of the course fee.
- Course places are only secured once payment has been successfully fully processed.
- Please note the NOI office is open Tuesday to Friday.

Mobilise – to prepare, to awaken and to move

NOI's classic, longest running course, *Mobilisation of the Nervous System*, has evolved. Based on the latest evidence, the course has been updated and re-written 'from the basic science up'. The research is compelling – the immune system via its interaction with the nervous system is a critical player in learning, memory, movement and sensitivity. This new understanding integrates peripheral and central processes and targets therapy towards healthy neuroimmune balance.

This comprehensive lecture and hands-on course integrates the latest research on neurodynamics and neuroimmune science to provide a clinical reasoning framework to identify those patients who will benefit from neuroimmune mobilisation. The course then updates and refines the essential practical skills to examine and manage the physical health of the nervous system – skilled, safe and appropriately timed handling techniques are covered in detail during labs and practical sessions.

Course aims

- Provide a basic knowledge of neuroanatomy, neurodynamics, neuroimmunology and neuropathobiology related to the manual examination of the nervous system.
- Teach safe and effective diagnostic skills in the examination and interpretation of physical dysfunction of the nervous system.
- Present neurodynamic movements and techniques as antigenic.
- Provide new therapeutic narrative for explaining symptoms in conditions with altered neurodynamics.
- Deliver a deeper understanding of known, 'tough' clinical presentations such as chronic nerve root problems and persistent entrapment pathologies.

Michel Coppieters

He had the opportunity to research this topic during his doctoral studies at the University of Leuven in Belgium, and later as a post-doc and academic at The University of Queensland in Brisbane, Australia. Following three years as Professor of Musculoskeletal Physiotherapy and Program Director of the Master of Science in Musculoskeletal Physiotherapy Sciences in Amsterdam, The Netherlands, he returned to Australia in 2017 and is now Professor at Griffith University. He continues to lecture and research the 'Neurobiology of pain' and the 'Clinical diagnosis and management of patients with neuropathies'.
